- · Coverage is excluded for loss or damage to tubes, transistors or similar electronic components.

#### SPECIAL COVERAGE

Covered Causes of Loss means risks of direct physical damage, unless the loss is excluded. The following are exclusions applicable to special coverage in the Farm Property form:

- Fire, if loss or damage is sustained by buildings or contents usual to tobacco barns, as a result of using open fire to cure or dry tobacco, and occurs while tobacco is being fired or within a 5-day period thereafter.
- Collapse, except as provided in the additional coverage entitled Collapse.
- Windstorm or hail to dairy or farm products in the open, or watercraft or their trailers, furnishings, equipment and motors, unless in fully enclosed building.
- Rain, snow, ice, or heat to personal property in the open.
- Rain, snow, sleet, sand, or dust, whether driven by wind or not, to the interior of a building or structure or property within, unless the building first sustains wind or hail damage to roof or walls.
- Freezing or thawing, or pressure or weight of water or ice to foundations, retaining walls, pavements, patios, fences, swimming
  pools, or bulkheads, docks, piers, or wharves.
- Discharge or overflow of water or steam from plumbing, heating, air conditioning, or automatic fire protective systems or within
  a household appliance, if in the form of continuous seepage over a long period; is caused by discharge taking place off the
  insured location; caused by freezing in a vacant or unoccupied building, unless heat is properly maintained or the water supply
  is shut off; if in a building or structure vacant for more than 30 days.
- Freezing of plumbing, heating, air conditioning, or automatic fire protective system, unless heat is maintained or the water is shut off.
- tires or inner tubes if caused by collision, upset or overturn; contact between a tractor and an implement during towing, hitching
  or unhitching; foreign objects taken into any farm machine or mechanical harvester; and contact of a vehicle with a roadbed or
  ground, causing loss to farm machinery.
- Artificially generated electrical current that disturbs electrical devices, appliances and wires, and to tubes, transistors or other electronic components (under Coverage A, B, C and D).
